

SECTION 5 - Wire Management Products

This section features a wide range of components, devices and accessories used to protect, bundle and secure, and seal (passing through walls and bulkheads), a variety of wires, cables, pipes, conduits, and more.

Products presented here are manufactured with high quality materials, designed, built and tested according to the applicable International and North American standards.

This section features the following families of products:

- 
Cable Glands (or Strain-relief Cord Connectors):
 ITC has an extensive range of plastic and metal glands (strain relief cord connectors), with different features. Most models are available in Metric, Pg, NPT and BSP (gas) thread.

- Thread Adapters and gland accessories:**
 Gland accessories such as locknuts, special seals and washers, thread adapters, plugs and ventilation plugs.

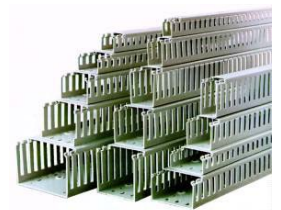

- 
Cable Clamps:
 These devices secure, hold and collect cables, conduits, bundles of wires. ITC carries several plastic models for diameters up to 50mm (2").

- Cable Ties:**
 A wide range of standard, UV-resistant, hole-mount cable ties, as well as mounting accessories.

- 
Spiral Wrapping Band:
 Bundles cables, wire and tubing together efficiently and economically. Highly flexible, for use in both static and dynamic applications.

- Wire Duct (or Wiring Channel) and Flexible Wire Duct:**
 Plastic wire and cable conveying devices, supplied either solid or slotted, in sizes up to 150mm (6") wide. Flexible duct in 3 sizes up to 40mm wide, also available with adhesive backing.

- Cable Entry Systems:** Split cable glands and cable passing frames permit the passage of pre-terminated cables and wires while providing sealing and strain relief, in the transition from the exterior environment to a panel, enclosure, or machinery.
